Forecast for Thursday 09 Sep 2021

Weather: Overnight showers will move away to give a dry morning with any early low cloud clearing. A warm, muggy afternoon with plenty of sunny spells, but scattered heavy and thundery showers will develop through the day. Some of these may be briefly torrential, and a met office weather warning for thunderstorms has been issued. Showers will tend to slowly fade into the evening and overnight.

Chance of cloud free mountain/hill tops above 600m: 40% to start the day, improving to 90% through the morning but with heavy showers likely to obscure peaks where they occur during the afternoon and evening.

Visibility: Patchy low cloud possible to start the day, with bases of 200-400m in places, these clearing through the morning. Visibility becoming generally good into the afternoon but falling to a few kilometres during showers, and locally worse over some exposed peaks as cloud bases may lower to 400-600m in association with particularly heavy showers.

Forecast for Friday 10 Sep 2021

Weather: Patchy cloud and a continued risk of scattered showers. These generally somewhat lighter than Thursday but remaining heavy in places with a risk of thunder.

Maximum wind: West-southwesterly winds of 15-20mph possible over exposed peaks.

Chance of cloud free mountain/hill tops above 600m: 40% to start the day, improving to 90% through the morning but with heavy showers possibly obscuring peaks where they occur.

Visibility: Patchy low cloud likely to start the day, with bases of 200-400m in places, these clearing through the morning. Visibility becoming generally good into the afternoon but falling to a few kilometres during showers, and locally worse over some exposed peaks as cloud bases may lower to 500-600m in association with particularly heavy showers.

Temperature: **Valleys:** Plus 14 Celsius rising to 20 Celsius during the afternoon.
At 600m: Plus 14 Celsius rising to 18 Celsius during the afternoon.
Freezing level: Above summits.
